

Aashna Sharma

MERN Full Stack Developer · Scalable Systems · REST APIs · Node.js · React.js · TypeScript

aashnajuyal@gmail.com |
github.com/aashnasharma1 | linkedin.com/in/aashnasharma1

Professional Summary

MERN Full Stack Developer with **2+ years of full-time experience** building scalable, high-performance web applications using MongoDB, Express.js, React.js, and Node.js.

Experienced in designing **RESTful APIs**, optimizing backend performance, and delivering **end-to-end features** in agile environments. Strong focus on **clean architecture, system scalability, and production-grade deployments**.

Proficient in **JavaScript, TypeScript**, and modern development practices including **CI/CD, containerization, caching strategies, and performance optimization**. Passionate about building reliable systems that solve real-world problems.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Redux Toolkit, Next.js, React Query, Tailwind CSS, SCSS
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, JWT Authentication
- **Databases:** MongoDB, MySQL
- **Architecture:** Modular Architecture, API Design, Microservices (basic), Event-driven concepts
- **DevOps & Cloud:** Git, GitHub Actions, CI/CD, Docker, Azure Fundamentals
- **System Concepts:** Caching, Logging, Debugging, Performance Optimization

Professional Experience

MERN Full Stack Developer (Module Lead Responsibilities)

Mar 2025 – Present

AllHeart Web, Chandigarh

- Led a team of **5 developers**, managing frontend modules and ensuring timely delivery through code reviews and sprint planning
- Owned **end-to-end feature development** from requirement gathering to deployment, improving delivery speed by **30%**
- Designed and developed **scalable RESTful APIs** using Node.js and Express.js
- Implemented **modular backend architecture** improving maintainability and scalability
- Optimized API performance and introduced **caching strategies**, reducing response time by **30%**
- Built and integrated **third-party APIs** and services into production systems
- Contributed to a **blockchain-integrated application**, handling secure transaction workflows
- Configured **CI/CD pipelines** and containerized applications using Docker, reducing deployment time by **50%**
- Implemented **logging and debugging mechanisms** to improve system reliability
- Collaborated in an **agile development environment**, participating in sprint planning and architecture discussions

- Developed IT Asset Management System used by **500+ users** with scalable frontend and backend integration
- Built and integrated **REST APIs** with robust error handling and data validation
- Improved application performance, reducing load time by **22%**
- Delivered **4 major modules end-to-end**, ensuring high-quality and maintainable code
- Followed clean coding practices and debugging strategies, reducing bugs by **18%**
- Collaborated with cross-functional teams in an **agile workflow**

Projects

Blockchain-based Asset Tracking System

MERN Stack

- Designed backend APIs for secure asset tracking with transaction validation workflows
- Integrated blockchain layer with backend services ensuring data integrity
- Implemented error handling and performance optimization techniques

Full Stack Admin Dashboard

MERN Stack

- Built scalable dashboard with authentication, RBAC, and API-driven architecture
- Reduced data load time by **45%** through optimization techniques

AI Resume Builder

- Developed multi-step form-based application with real-time preview and state management

Education

B.E. Computer Science
Chitkara University

Aug 2020 – Aug 2024
CGPA: 9.56

Certifications

Microsoft Azure Fundamentals (AZ-900)

Achievements

- Winner — Great Indian Hackathon
- Winner — Solving for India Hackathon
