

Aashna Sharma

TypeScript-First Full Stack Engineer · AI-Native Developer · Node.js · React.js · MongoDB

aashnajuyal@gmail.com | +91 77400 98932 | Chandigarh, India | github.com/aashnasharma1 | linkedin.com/in/aashnasharma1

Professional Summary

TypeScript-first Full Stack Engineer with **2+ years of hands-on experience** building scalable, high-performance web applications using React.js, Node.js, and MongoDB. Proven track record in designing **RESTful APIs**, leading frontend modules, and delivering **end-to-end features** in agile environments.

AI-native developer with **daily active usage of Claude Code and GitHub Copilot** as primary development tools — accelerating code generation, debugging, and architectural decision-making. Passionate about clean architecture, production-grade reliability, and building systems that solve real-world problems at scale.

Technical Skills

- **Languages:** TypeScript (primary), JavaScript (ES6+), HTML5, CSS3
- **Frontend:** React.js, Redux Toolkit, Next.js, Tailwind CSS, SCSS, Webpack, NPM
- **Backend & APIs:** Node.js, Express.js, RESTful API Design, JWT Authentication, OAuth
- **Databases:** MongoDB (aggregation pipelines, indexing, schema design), MySQL
- **AI Tools (Daily Use):** Claude Code, GitHub Copilot — code generation, debugging, documentation & architecture
- **System Concepts:** Caching strategies, logging, debugging, performance optimisation, API security

Professional Experience

MERN Full Stack Developer (Module Lead)

Mar 2025 – Present

AllHeart Web, Chandigarh

- Led a team of **5 developers**, managing frontend modules, conducting code reviews, and driving sprint planning to ensure timely, high-quality delivery
- Owned **end-to-end feature development** from requirement gathering to deployment, improving delivery speed by **30%**
- Designed and built **scalable RESTful APIs** in TypeScript/Node.js and Express.js with strong type safety and modular architecture
- Integrated **Claude Code and GitHub Copilot** daily into the development workflow — accelerating feature output and reducing debugging cycles
- Implemented **caching strategies** and API performance tuning, reducing average response time by **30%**
- Integrated **third-party APIs and payment gateway services** into production systems with robust error handling
- Applied **JWT and OAuth-based authentication** and role-based access control across multiple modules
- Worked with **MongoDB** for document storage, designing schemas optimised for read/write performance
- Championed **logging and monitoring mechanisms** to improve system reliability and faster incident resolution

- Collaborated in an **agile pod environment** — daily standups, sprint reviews, and architecture discussions

Software Development Engineer

Jun 2023 – Jun 2024

CG Infinity, Noida

- Developed an **IT Asset Management System** serving 500+ users with a scalable TypeScript/React frontend and Node.js backend
- Built and integrated **REST APIs** with robust error handling, data validation, and strong TypeScript typing
- Improved application load time by **22%** through code splitting, lazy loading, and query optimisation
- Delivered **4 major modules end-to-end**, ensuring maintainable, well-documented code
- Reduced bug count by **18%** through clean coding practices, unit tests, and systematic debugging
- Collaborated with cross-functional teams in an agile workflow

Projects

BlueBill OCR

React.js · Tesseract.js · Redux · Tailwind CSS · PDF.js · TypeScript

- Built a browser-based billing scanner using Tesseract.js OCR — directly relevant to FinTech billing and document digitisation workflows
- Supported drag-and-drop uploads, live webcam capture, and PDF parsing with no backend dependency
- Fully typed in TypeScript with Redux state management for clean, scalable architecture

PhotoTools

Next.js · Cloudinary API · Clerk · TypeScript

- Built an AI-powered photo editing app using Next.js server-side components for optimised performance
- Implemented background removal, generative fill, and image transformation via Cloudinary's API
- Integrated Clerk for seamless authentication with OAuth support

AllHeart — Employee Management Portal

React.js · Redux · Node.js · MongoDB · TypeScript · REST APIs

- Developed a full-stack internal HR portal with attendance tracking, leave management, and task assignments
- Built project tracking, salary workflows, and activity logs used daily across the organisation

Sapher — Admin Portal

Vue.js · Vuex · Node.js · MongoDB · REST APIs

- Built a secure admin portal for monitoring website access requests and blocking malicious URLs
- Implemented employee permission management and organisation-wide safety score tracking

Education

B.E. Computer Science

Chitkara University, Punjab

Aug 2020 – Aug 2024

CGPA: 9.56

Certifications

Microsoft Azure Fundamentals (AZ-900)

Achievements

- Winner — Great Indian Hackathon
- Winner — Solving for India Hackathon
